The Law: Only the US President can wave informed consent

10 U.S. Code § 1107 - Notice of use of an investigational new drug or a drug unapproved for its applied use

(f)Limitation and Waiver.—

(1)In the case of the administration of an [investigational new drug](#) or a [drug unapproved for its applied use](#) to a member of the armed forces in connection with the member’s participation in a particular military operation, the requirement that the member provide prior consent to receive the drug in accordance with the [prior consent requirement](#) imposed under section 505(i)(4) of the [Federal Food, Drug, and Cosmetic Act \(21 U.S.C. 355\(i\)\(4\)\)](#) **may be waived only by the President. The President may grant such a waiver only if the President determines, in writing, that obtaining consent is not in the interests of national security.**

Letter from the Secretary of Defense

This letter from **August 24, 2021** states:

“Mandatory vaccination against COVID-19 will only use COVID-19 vaccines that receive full licensure from the Food and Drug Administration (FDA), in accordance with FDA-approved labeling and guidance.”

[Letter Secretary of Defense Aug 24](#)

The only one FDA approved is Comirnaty, and it is not available for distribution in the US. (See *below for more in depth information*)

The Law Emergency Use Authorization:

21 U.S.C. § 360bbb-3 - U.S. Code - Unannotated Title 21. Food and Drugs § 360bbb-3. Authorization for medical products for use in emergencies (Pay attention to section 5 "Explanation by Secretary")

“(III)of the option to accept or refuse administration of the [product](#), of the consequences, if any, of refusing administration of the [product](#), and of the alternatives to the [product](#) that are available and of their benefits and risks.”

[Cornell Law: Fed Law FDA Emergency Auth](#)

As far as the law goes Pfizer BioNTech and Comirnaty are **legally separate** Both are made by Pfizer. BioNTech is only granted an extended EUA. Comirnaty is FDA approved, but **NOT available for distribution**. As a medical procedure, they are interchangeable, but as far as the **law** is concerned they are not. The law stated above applies to the EUA. You have the right to turn down an EUA product, and at the moment there are no other alternatives available for distribution in the US that are FDA approved.

[Pfizer FDA letter MsHarkins](#)

(Page 5 Annotation 9) 9 Although COMIRNATY (COVID-19 Vaccine, mRNA) is approved to prevent COVID-19 in individuals 16 years of age and older, there is not sufficient approved vaccine available for distribution to this population in its entirety at the time of reissuance of this EUA. Additionally, there are no products that are approved to prevent COVID-19 in individuals age 12 through 15, or that are approved to provide an additional dose to the immunocompromised population described in this EUA.

(Page 2 Annotation 8) 8 The licensed vaccine has the same formulation as the EUA-authorized vaccine and the products can be used interchangeably to provide the vaccination series without presenting any safety or effectiveness concerns. The products are legally distinct with certain differences that do not impact safety or effectiveness.

[Pfizer FDA Letter MrPatel](#)

Mr. Patel's letter is similar to Ms. Harkins letter. On page 1 it specifies that Pfizer BioNTech was renewed as an EUA.

(Page 3 Annotation 10) 10 The licensed vaccine has the same formulation as the EUA-authorized vaccine and the products can be used interchangeably to provide the vaccination series without presenting any safety or effectiveness concerns. The products are legally distinct with certain differences that do not impact safety or effectiveness.

(Page 6 Annotation 12) 12 Although COMIRNATY (COVID-19 Vaccine, mRNA) is approved to prevent COVID-19 in individuals 16 years of age and older, there is not sufficient approved vaccine available for distribution to this population in its entirety at the time of reissuance of this EUA. Additionally, there are no products that are approved to prevent COVID-19 in individuals age 12 through 15, or to provide: an additional dose to the immunocompromised population, or a booster dose to the authorized population described in this EUA.

Natural Immunity:

The immune systems of more than 95% of people who recovered from COVID-19 had durable memories of the virus up to eight months after infection. The results provide hope that people receiving SARS-CoV-2 vaccines will develop similar lasting immune memories after vaccination.

[Lasting immunity found after recovery from COVID-19](#)

Long-lived bone marrow plasma cells (BMPCs) are a persistent and essential source of protective antibodies [1,2,3,4,5,6,7](#). Individuals who have recovered from COVID-19 have a substantially lower risk of reinfection with SARS-CoV-2 [8,9,10](#).

[SARS-CoV-2 infection induces long-lived bone marrow plasma cells in humans](#)

This study demonstrated that natural immunity confers longer lasting and stronger protection against infection, symptomatic disease and hospitalization caused by the Delta variant of SARS-CoV-2, compared to the BNT162b2 two-dose vaccine-induced immunity. Individuals who were both previously infected with SARS-CoV-2 and given a single dose of the vaccine gained additional protection against the Delta variant.

Children's Health Defense Sues FDA Over Approval of Pfizer Comirnaty Vaccine

The lawsuit, filed Aug. 31, alleges the U.S. Food and Drug Administration violated federal law when the agency simultaneously licensed Pfizer's Comirnaty COVID vaccine and extended Emergency Use Authorization for the Pfizer-BioNTech vaccine.

Military Service Members With Natural Immunity File Lawsuit Against DOD, FDA, HHS Over COVID Vaccine Mandate

According to the lawsuit, the military's existing laws and regulations unequivocally provide the exemption the plaintiffs seek under Army Regulation 40-562 ("AR 40-562"), which provides documented survivors of an infection a presumptive medical exemption from vaccination because of the natural immunity acquired as a result of having survived the infection.
